The following is a step-by-step guide for sites that want to provide their users with an instruction set to install JMP on their machines.

Note: This SAS Note is not intended to address any environmental or system-related issues that might arise during the installation process. If any deviations are encountered during the installation, verify whether you are running a version of JMP supported by your operating system as listed in <u>JMP System Requirements</u> (Macintosh). Otherwise, contact your IT Administrators. You can also contact JMP Technical Support via <u>Technical Support Services</u>.

- 1. Download the JMP Software Depot to the Downloads folder on your computer.
- 2. Install JMP.
 - a. In the Downloads folder, browse to

the /JMP/JMP/<version>/Macintosh directory and *double-click* the installer.

I.E. jmppro__<version>__mac.dmg or jmp__<version>__mac.dmg file.
